ABHIPSA CHAKRABORTY

Renewable Energy Engineer | Biotechnology Engineer | Project Coordinator

Tilburg, Netherlands | abhitorsa99@gmail.com | +91 7450847864
linkedin.com/in/abhipsa-chakraborty-8ab8972b8 | github.com/abhipsa99-ch

PROFESSIONAL SUMMARY

Multidisciplinary engineer combining a European Master's in Renewable Energy (EUREC) with a Bachelor's in Biotechnology, backed by international project experience across the Netherlands, Greece, Spain, and India. Specialises in offshore and floating wind engineering, wind resource assessment, and techno-economic analysis, alongside biotechnology, clinical laboratory diagnostics, and GLP/GMP quality systems. Skilled at coordinating cross-functional, multi-stakeholder teams across both engineering and life-science environments.

CORE COMPETENCIES

Offshore & Floating Wind Engineering	Biotechnology & Molecular Biology	GLP / GMP / SOP Compliance
Wind Resource Assessment & AEP	Clinical Diagnostics & Sample Processing	Spectroscopy Analysis
Techno-Economic Analysis (LCOE)	Reagent & Buffer Preparation	Project Coordination
DNV WindFarmer / Bladed	Python · MATLAB · SQL · Excel	Stakeholder Communication

PROFESSIONAL EXPERIENCE

Offshore Structural & Mooring Engineer (Floating Wind)

Mondragon University, Spain | Jul – Dec 2024

- Coordinated multidisciplinary engineering activities for floating offshore wind projects, improving workflow efficiency by 35% and structural assessment accuracy by 20%.
- Delivered project milestones on schedule in collaboration with international research partners.

Wind Energy Analyst

National Technical University of Athens, Greece | Feb – May 2024

- Conducted aerodynamic analysis, wind resource assessment, and AEP studies, improving wind forecasting accuracy by 15%.
- Constructed and Cp–λ tested a laboratory-scale horizontal-axis wind turbine; prepared technical reports for project reviews.

Renewable Energy Project Engineer

Hanze University of Applied Sciences, Netherlands | Dec 2023 – Jan 2024

- Performed techno-economic analysis for renewable energy systems, cutting estimated CO■ emissions by 30% and improving LCOE by 10%.

HR Generalist

Apex Digital Venture | Mar – Jul 2026

- Managed end-to-end HR operations for 40+ employees, reducing onboarding processing time by 20%.
- Coordinated recruitment for 15+ open roles, maintaining 100% on-time offer turnaround.

Laboratory Assistant

Sanjeevani Labs, India | Sep 2025 – Feb 2026

- Processed 120+ patient samples weekly for diagnostic testing under full GLP/GMP/SOP compliance.
- Performed reagent & buffer preparation, sample processing, and laboratory documentation in a regulated environment.

Spectroscopy Analyst

Amity University, India | Feb – May 2022

- Analysed 50+ biological samples using spectroscopy techniques for research purposes.
- Improved analytical accuracy by 20% through optimised laboratory methods and rigorous data checking.

Clinical Laboratory Technician Trainee

Sanjeevani Labs, India | Jul – Aug 2021

- Processed 100+ clinical specimens for diagnostic investigations under time pressure.
- Assisted in cervical cancer screening and pathological testing, reducing analysis time by 30%.

Laboratory Intern – Biodiesel Production from Jatropha Plants

Indian Institute of Technology Kharagpur | May – Jun 2021

- Researched biodiesel production from Jatropha plants as a renewable feedstock alternative.
- Prepared chemicals, reagents, and laboratory solutions; performed analytical testing and experimental documentation.

EDUCATION

European Master in Renewable Energy (EUREC), 2025 — Hanze University of Applied Sciences, NL · NTU Athens, GR · Mondragon University, ES

Bachelor of Biotechnology, 2023 — Amity University, India

LANGUAGES

English (IELTS Overall Band 7.0) · Dutch (Beginner) · German (A2/B1)
