ABHIPSA CHAKRABORTY

Utrecht, Netherlands | +31 6 26927043 | abhitorsa99@gmail.com | linkedin.com/in/abhipsa-chakraborty-8ab8972b8

Work permit: Orientation Year Visa (Zoekjaar), valid until July 2027, with full working rights in the Netherlands now. To continue after that date, an employer would need to convert it to a Highly Skilled Migrant visa. **Languages:** English (fluent), Dutch (A1–A2, learning actively).

ABOUT ME

I started out as a biotechnologist and went on to do a Master's in Renewable Energy, so I bring an unusual mix: the careful discipline of the lab bench and the systems thinking of wind and energy engineering. I'm early in my career in both fields rather than deeply specialised in one, and I'm honest about that. What stays the same across both is how I work: I plan experiments and analyses carefully, document them properly, and don't trust a result until I understand where it came from. I'm open to roles on either side of that split, or in between, such as bioenergy and biomass.

WIND AND RENEWABLE ENERGY EXPERIENCE

Graduate Researcher, Offshore Structural and Mooring Engineering (Floating Wind) | Mondragon University, Spain *Jul 2024 – Jan 2025*

- Coordinated the structural and mooring assessment of a floating wind design with an international team.
- Wrote Python routines to speed up load-case processing and catch structural inconsistencies early, improving workflow efficiency by 35% and structural assessment accuracy by 20%.

Graduate Researcher, Wind Energy Analysis | National Technical University of Athens, Greece *Feb 2024 – May 2024*

- Carried out wind resource assessment and AEP studies, improving forecasting accuracy by 15%.
- Built and tested a lab-scale horizontal-axis turbine, checking its Cp–λ curve against theory.

Graduate Researcher, Renewable Energy Systems | Hanze University of Applied Sciences, Netherlands *Dec 2023 – Jan 2024*

- Used MATLAB for techno-economic modelling of renewable energy systems, feeding into projects aimed at a 30% CO_2 reduction and a 10% LCOE improvement.

LAB AND LIFE SCIENCES EXPERIENCE

Laboratory Assistant | Sanjeevani Labs, India *Sep 2025 – Feb 2026*

- Processed 120+ patient samples every week in line with GLP, GMP and SOP requirements; prepared and logged reagents and buffers.

Laboratory Technician | Thesim Diagnostic Centre, India *May 2025 – Aug 2025*

- Ran 100+ urine and blood tests a week and processed 400+ patient samples over four months, following SOPs throughout.

Undergraduate Research Assistant, Spectroscopy | Amity University, India *Feb 2022 – May 2022*

- Analysed 50+ biological samples and improved analytical accuracy by 20% by refining the methods used.

Clinical Laboratory Technician Trainee | Sanjeevani Labs, India *Jul 2021 – Aug 2021*

- Processed 100+ clinical specimens, including cervical cancer screening, with careful labelling and documentation.

Research Intern, Biodiesel Production | Indian Institute of Technology, Kharagpur *May 2021 – Jun 2021*

- Tested 30+ seed and oil samples from Jatropha plants for a renewable feedstock study; prepared reagents and documentation for 20+ trials.

OTHER EXPERIENCE

Guest Service and Housekeeping Associate | Accor Group of Hotels (Ibis and Mercure) *Sep 2026 – Present*

- Took this role alongside my job search, supporting daily housekeeping and guest service across two hotels.

PUBLISHED RESEARCH

Heliyon (2023): co-authored a peer-reviewed article on an extension of cancer immunotherapy involving dostarlimab and the PD-1/PD-L1 pathway. Vol. 9, Issue 12, Article e23169.

EDUCATION

MSc Renewable Energy (EUREC) | Hanze University (NL), NTUA (Greece), Mondragon University (Spain) *Sep 2023 – Apr 2025*

B.Tech Biotechnology | Amity University, India *Aug 2018 – Jul 2022 (awarded 2023)*

SKILLS AND TOOLS

Wind and energy: Python, MATLAB, OrcaFlex, DNV WindFarmer, Bladed, Excel; wind resource assessment, AEP analysis, offshore and floating wind engineering, techno-economic modelling.
Lab and life sciences: PCR, gel electrophoresis, DNA isolation, mammalian cell culture, molecular biology, spectroscopy, centrifugation, latex agglutination, gel filtration and downstream techniques; GLP/GMP/SOP-compliant documentation, lab safety and chemical handling.
